Quinoa History

Quinoa is a grain that is native to the Peruvian Andes. At the height of the Inca era, it was considered to be sacred food, as well as being used for medicinal purposes. On religious holidays, quinoa was offered to the Sun God in a golden bowl, and every year it was the same Inca who was responsible for initiating the planting season in a major ceremony.

Quinoa is a food of high nutritional value, a unique vegetable food grain that contains in the core of the grain all the essential amino acids, trace elements and vitamins for a healthy life, and it does not contain gluten.

Today, Andean hands cultivate this golden grain with the same care and zeal of ancient times.

This is our Quinoa, from Peru to the World.

****The consumption of undercooked foods of animal origin, such as eggs, beef, chicken, or fish is not recommended. Thoroughly cooking foods of animal origin greatly reduces the risk of foodborne illness.
